SUMMARY

I am an experienced technical leader and people manager with 20 years of experience in software development. I value integrity, work/life balance, and working collaboratively.

I seek a leadership role in an organization with a strong engineering culture. I am enthusiastic about iterative development, testing, coaching, and delivering value to customers. I am looking for a company with shared values where I can do work that I'm passionate about.

WORK EXPERIENCE

Stitch Fix, Inc.

Principal Software Engineer / Manager

July 2015 — Present

San Francisco CA

- Led the consumer web team:
 - Grew the web team from 2 to 9 engineers over four months.
 - Prepared team for scale and rapid change by formalizing the development process. This included introducing regular iteration planning, story writing, and retrospectives.
 - Improved site reliability by addressing a significant backlog of technical debt.
 - Acted as a thought leader in company-wide efforts to improve system resiliency.
- Led the buying team (prior to the consumer web team):
 - Responsible for product roadmap supporting buyers within Merchandising.
 - Reduced friction among stakeholders by introducing new processes for prioritizing features.
 - Provided technical direction for development of improved buying tools.
 - Led development of a vendor portal to successful launch.

Comcast Corporation

Engineering Manager

July 2014 — July 2015

Sunnyvale CA

- Managed a cross-functional team of 6 direct reports using a Scrum methodology.
- Successfully delivered My Family Finder, a family locator application.
 - Coordinated the efforts of 16 team members on the project.
 - Led concurrent development of iOS, Android, and X1 (TV) applications.
- Improved quality and timelines of deliveries by focusing additional team efforts on testing and code review.

Senior Software Engineer

September 2012 — July 2014

Sunnyvale CA

- Built the EcoSaver reporting functionality for the Xfinity Home web portal.
- Led development of a rules engine for use with home automation devices.

Mission Critical Labs, Inc.**Founder**

2005 — September 2012

San Francisco CA

- Founded a consultancy focused on web development.
- Worked as both an individual contributor and leader of a small engineering team.
- Oversaw all aspects of the business and its operations.
- Built and maintained strong client relationships.
- Launched multiple large e-commerce sites, as well as several streaming video and interactive product customization solutions.
- Successfully delivered hundreds of projects for companies including Macy's, Speck, ITVS, Life360, Good Housekeeping, Pepsi Bottling Group, and Rickshaw Bagworks.
